Career Objective

Motivated Computer Science Instructor transitioning into a Junior Software Engineer role, with strong foundations in algorithms, data structures, and real-world problem-solving through online judges. Seeking to contribute to ZeuZ's innovative engineering team by building reliable, scalable applications using React.js, Node.js, PostgreSQL, and modern testing practices. Eager to apply my teaching-driven clarity, strong analytical skills, and continuous learning mindset to deliver clean, tested, and maintainable code while growing into a full-stack automation-focused engineer.

Professional Experience

CS Instructor, Phitron Team(Programming Hero) | [December 2024] – Present

- Provide real-time support to students by answering technical queries on programming concepts (C/C++, DSA, OOP, databases) via group forums and 1:1 sessions.
- Conduct 1 daily support session to clarify problem-solving approaches and debug code, maintaining a 100% student satisfaction rate.
- Deliver weekly conceptual sessions to 200+ students, breaking down complex problem-solving approaches and guiding best practices for competitive programming and real-world applications.
- Collaborate with team members to resolve complex programming challenges and improve course materials.

Skills

Expertise: C/C++, Python, Django, HTML, CSS, Bootstrap, Tailwind CSS, JavaScript, ES6, React JS.

Comfortable: OOP, DBMS, DSA, Material UI, Node JS, Express JS, MongoDB, Authentication.

Familiar: AWS, GCP, Next JS, Celery, DRF, Prizma, and Redis.

Tools: Git, Chrome Devtool, Firebase, Netlify, Heroku, Figma, Photoshop, Illustrator.

Projects

ProStream: (Streaming Site-Team Project) Live Site | Client & Server Code

A live streaming platform with real-time chat, tip functionality, built with React, Django, and deployed on AWS.

- Implemented full project frontend part with a responsive web application for desktop, tablet and mobile.
- Collaborated closely with the backend team to seamlessly integrate the Agora service, ensuring a secure API implementation.
- Successfully implemented the SSLcommerze payment gateway method, enabling users to tip streamers during live streams, while providing streamers with an efficient withdrawal process.
- Contributed to project success by providing valuable insights during critical project phases and crafted detailed API tests for diverse functionalities, ensuring robustness and reliability.

Technology Used: Python, Django, Django Rest Framework, ReactJs, AWS EC2, PostgreSQL.

Issue Tracker App: Live Site | Client & Server Code

- User authentication and authorization
- Create, view, and manage issues
- Search functionality
- Responsive design for mobile devices

Technology Used: Typescript, NextJS, Tailwind CSS, Prizma, Zod validation

Easy Rent: (Rental vehicle-Team Project) **Live Site** | **Client-Side Code** | **Server-Side Code**

- ❖ Fully responsive app with Firebase Authentication, React Router, and Material UI.
- ❖ Users can buy some driving courses and rent drives using this web application.
- ❖ Admin can see all vehicles, add and remove vehicles, see all orders of course and vehicle, post a blog, and delete unpaid payment information.
- ❖ Users can chat with the admin panel and other users who use rental vehicles from this organization.

Technology Used: React, React Router, Material UI, Redux, Firebase

Airplane Website: (Service and E-commerce Based Website) **Live Site** | **Client Code** | **Server Code**

- ❖ A Fully responsive MERN Stack app with multiple authentication systems. All data is loaded from the database.
- ❖ Dashboard Functionality for Admin and Customers separately. Admin Will be able to manage all orders, add or remove any services, and add a user as admin.
- ❖ After login customers can place orders, see my orders, add reviews, and see all reviews.

Technology Used: React, React Router, Express, MongoDB, Firebase

Library Management: Code

- ❖ Fully responsive app with Firebase Authentication.
- ❖ Users can buy books and rent books from this website.
- ❖ Admin can see all books, add and remove books, see all rentals of books, post a blog, and delete unpaid payment book information.
- ❖ Users can chat with the admin panel and other users who use rental books from this organization.

Flight Scheduler: Code

- ❖ Full Python OOP-based project.
- ❖ Flight creation and management, Passenger booking, and seat allocation.
- ❖ Date and time scheduling, Ticket pricing, and fare calculation.

Django Mart: Code

- ❖ Online shopping website built using the django framework.
- ❖ Users can see all products based on different categories, add to a cart, and buy products using payment methods.

Problem-Solving Skill

- ❖ I have solved some problems on various websites. **Codechef** | **Codeforces** | **Leedcode**

Education

B.Sc. in Computer Science and Engineering (CSE)
Begum Rokeya University, Rangpur
2020 – 2025 (Graduated: 28 Oct 2025)

Certificates & Professional Training

- ❖ CSE Fundamentals with Phitron. Certificate
- ❖ Complete Web Development Course with Programming Hero. Certificate

Achievements

- ❖ Recommendation letter from Complete Web Development Course from Programming Hero.
- ❖ Divisional Champion - ICPC Dhaka Regional 2024

Language Proficiency

- ❖ English (Fluent), Bangla (Native)
